

What is claimed is:

1. An outlet airflow direction control unit,
comprising:

5

a frame having an inlet and an outlet, said outlet
being provided on a peripheral wall with a plurality
of radially projected fluid control elements; and

10

a fan being supported in said frame;

whereby when said fan is rotated to cause an amount
of fluid to flow into and out of said frame via
said inlet and said outlet, respectively, said
15 fluid control elements provided in said frame are
adapted to control a flow direction of said fluid
flown out of said outlet.

2. The outlet airflow direction control unit as
20 claimed in claim 1, wherein said fluid control
elements are control blades.

3. The outlet airflow direction control unit as
claimed in claim 1, wherein said fluid control
25 elements are ribs.

4. An outlet airflow direction control unit,
comprising:
- a frame having an inlet and an outlet, said inlet
5 being provided on a peripheral wall with a plurality
of radially projected fluid control elements; and
- a fan being supported in said frame;
- 10 whereby when said fan is rotated to cause an amount
of fluid to flow into and out of said frame via
said inlet and said outlet, respectively, said
fluid control elements provided in said frame are
adapted to control a flow direction of said fluid
15 flown out of said outlet.
5. The outlet airflow direction control unit as
claimed in claim 4, wherein said fluid control
elements are control blades.
- 20
6. The outlet airflow direction control unit as
claimed in claim 4, wherein said fluid control
elements are ribs.
